

INCREASE PROFITS AND HAVE MORE FUN

with the

VERSATILE SIMULATOR SYSTEM

The VSS can be configured for many different functions including aeroplanes, helicopters, racing / sports cars & boats. Difficulty settings are adjustable alongside thousands of possible scenarios

Exceptional construction quality and finish ensures the VSS stands out from the crowd

Choice of colours and materials to suit your companies branding

Levelling feet & trolley wheels

Wide stable robust base unit

The extra wide rear body combined with the integrated trolley wheels and adjustable levelling feet ensure a quick stable platform is achieved

Setup and removal times are less than one hour

The Versatile Simulator System (VSS) from Simulator logic enables your business to offer a selection of activities and experiences whilst only having to purchase and manage one single machine.

Multiple Configurations Include:

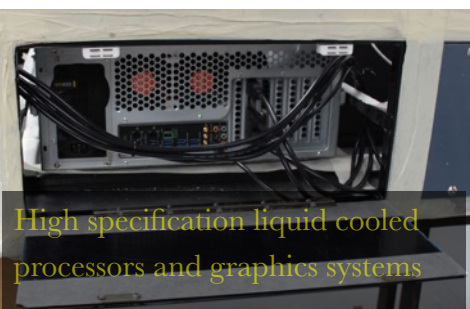

- Jet Fighters
- Gliders
- Helicopters
- Racing Cars

Initially designed to satisfy the demanding needs of the events and exhibition businesses; the VSS compact design is the result of close collaboration with several of the UK's leading events organisers and providers.

Compact design requires minimal floor space

Slide mounted computers enable rapid exchange or upgrades of components

High specification liquid cooled processors and graphics systems

The VSS platform is ideally suited for indoor events and exhibitions. The external panelling provides ideal surfaces for branding and advertising messages. Large screen area and high quality audio create truly immersive experiences. Integrated wheels combined with levelling feet allow the device to be moved around and located in venues efficiently and with ease.

- Highest quality robust construction
- Cost effective low maintenance hardware
- Networkable for one on one challenges
- Quick simple swapping of controls and functions
- Upgrade ready with slide mounted computers
- Easy to manoeuvre in and around venues
- Three 55 inch flat screen displays as standard
- New controls and games regularly added

Popular scenarios include:

- Jet landing on aircraft carrier
- Fastest lap at Silverstone
- Helicopter landing on oil platform
